

we have have had such lovely lovely days
 calm serene and free from ego noise
 - the ghostly bungalows - on top - last year
 dis-graced by the auric dis-ease Kali
 Math - has been unoccupied this year -
 except by the body free and fairly trouble
 ghosts. The tied up dog does bark nicely
 up there - for no other rhyme or reason
 than the ghosts, see is only a dog - says
 wuji - and dogs are often psychic -
 those at Nirtala were very uneasy and
 whining when Webbia (Beatrice Webb)
 left her body - Dr Alexander has left his
 body there in July - we must have told you
 The Christian donors of the small sanctuary
 "cave" next door - were announced as coming
 - but there is no sign of them yet - and
 we have had no staying visitors - all
 visitors are interesting - but some
 are more cerebral forms of our self
 than are others - nearly all fellow
 pilgrims are dis-eased - more or less
 un-eared in part - play and - blinks
 so few are - free - artists in life - integrally
 at home and playing at joyous ease
 wuji says. It is a strange ego world. Every
 - body - be queer - except me and thee -
 - and thee be a little queer - wu!
 yes, he is queer - but who is not?

we have been asked to write for some "against
sympathy" - "What the Panchen makes",
means to me - but Wuyi says there
is no mek - mek - mek and that
and mine are naughty words, symbols,
which Adwanta, wallah leave well alone
"What an exceeding rest it will be
when I can leave of being me -
But some impersonal scribbles has got
itself typed & though rather badly, and
we may send you some - It is simply
written, yet not simply enough. It writes
itself - true to the moment of our seeing
- and yet not - and not yet - true enough,
and have your meeting been getting on?
We are having an election on the 26th
and may go another for the second time
in this body - Lama Anagarika Gonsa
is well - busy with his book in English -
and his persistence (not better half) is
busy with her Spanish Chestnuts - they
prevent her and she cannot leave the place
for fear of loss - and monkey-folk brethren
(also two-legged ones) so we have actually
seen our Lamaji 4 times lately alone
- without her - as dumping acquaintance.
The title of Gonsa's new book is "The foundation
of Tibet as a mysticism". It is out so far,
only in German and had a very good review
in the last "Middle way".

It will be issued in at least 7 different
European languages soon. and a second
book - a still unborn babe - named 'The
White Cloud of Reminiscences of a western
traveler in Tibet' is bespoken and commis-
sioned. Earl H. Brewster's book on
Gautama Buddha - is out in third edition
and Dr W. Y. Evans Wentz well edited 5 volume
one of world renown. Will our cranky
ridge be put on the map? It is well that
some cracks are bell-bearing only - and
that the masterly Way is well disguised -
no real danger of being re - cognized
or merely under - stood. Why? Earl
Brewster is sinking - into coma and
oblivion - you will hardly see his
body again - It may not even be 99
on the 21-9 - see it resigned and ready to
go - and it is easy to let go of books,
and things, values and ideal concepts,
and also of reason, trying and conceit of agency
when it all has served its purpose in his
play and ones Karma is fulfilled. It is
easy to die when we do not stick in
ego, attachment or cling to phenomena.
There is no Real Death - no Death of the Real
- that we eternally are - so why fear and fuss
in angst, full flutter? why grief or pity?
Kripa, Karuna and Jemalaya are around a go
with you all - from Viking Bhair in Sunny &
